Hello there,

Please see the (2) attached testimonies for your reading pleasure. One is from EPA R3 (submitted in writing) and the other from Kevin Sunday, PA Chamber (in-person). In short, the Chamber in its testimony is asking for regularity certainty and makes mention that any potential decreases in Clean Fill “use” numbers would slow economic development and be costly to industry. I have not been able to locate any complaints from any of the larger NGO’s who track environmental concerns. However, industry is tracking this issue and as mentioned in the briefing this morning... a number of citizens and industry professionals have submitted written testimony on the issue. All mostly asking for certainty on the issue.
